

We are growing.
Are you?

Ogone is looking for a
QA ENGINEER / TEST ANALYST ^{M/F}
for our Brussels HQ

YOUR JOB

Your main responsibility is to support the different agile development teams in testing their user stories and follow-up testing occurring in different departments. In the day to day, you are part of the Software Development Life Cycle from start to delivery, first working with Agile Product Owners to improve User Stories quality, next supporting the developers while they build the software, in the testing phase itself you perform tests & defect follow-up; and lastly you help validate the Acceptance Criteria to achieve a successful release.

You are the (test) team member for one of our Development Teams, where you support the developers in improving their test cases or writing test cases yourself, performing both structured as exploratory testing and help investigate and follow-up defects.

You are also part of the centralized QA team. Together with the other QA-engineers, you help construct long term test process improvements and share them with your agile team. You are also the link between the test automation specialist and the teams, selecting good candidates for automated regression testing.

We offer you a position in a growing team, where:

- You can discover and put your talents to good use
- Your team members and coordinator support you in your tasks
- You are appreciated for your initiatives

Growth opportunities:

You would be joining a small team of several other dedicated QA Engineers, who have different but complementary talents. The Ogone QA team mainly interacts directly with the members of various agile development teams and with Product or Project Managers. The Ogone culture makes it possible for employees to explore new responsibilities within the function or even rotate into another job.

ogone

YOUR QUALITIES

Personal Background:

- Higher education in IT/Engineering or equivalent by experience
- 2+ years of experience in testing

Languages:

- Corporate language is English
- Knowledge of French and/or Dutch, knowing both is an asset

Technical skills:

- Technical affinity towards software
- Experience with HP Quality Center is an asset
- ISEB-certification is an asset
- Being familiar with Agile/Scrum methodology is an asset

Soft skills:

- You encourage change and continuous improvement, and like to work in a growing and fast-paced company
- You like to investigate complex problems and need a constant challenge
- You are creative, pro-active and you take action on your beliefs
- You are a good listener and negotiator
- You are a team player, but are independent and self-reliant in your tasks
- You like to focus your energy in an efficient way
- You live by the motto "Failure is just a step towards great quality"

WHY OZONE?

You work with complex products in a host of different sectors at the national and international level. You grow because your job challenges your skills every day. Your colleagues are all totally committed: there's a reason why we are growing all the time. In our open corporate culture you have freedom to achieve your goals and further your career.

Set your sights on becoming QA Engineer / Test Analyst? We welcome your drive. Your responsibilities and experience attract a competitive salary with benefits and training opportunities.
